Social Media - Natural Learning Environment

ME & INTERNET

Nelle settimane scorse gli studenti e le studentesse delle classi 3^B(1), 3^B(2), 3^E, in occasione del Safer Internet Day, hanno approfondito tematiche riguardanti l'utilizzo di internet e dei social media, soffermandosi sui pericoli della rete.

L'argomento è anche il filo conduttore del Progetto ERASMUS PLUS - Social Media - Natural Learning Environment, al quale il nostro Istituto ha aderito da alcuni anni.

Gli alunni e le alunne dei cinque paesi partecipanti al Progetto ERASMUS (Italia, Bulgaria, Polonia, Romania, Turchia) sono stati invitati a realizzare dei lavori multimediali che rappresentassero le loro idee e le loro opinioni in merito all'argomento.

Una giuria di docenti ha selezionato gli elaborati migliori della nostra scuola, che saranno pubblicati sulla pagina Facebook del Progetto Erasmus.

I classificati

Premio impegno a Gabriele Fortunato

Premio originalità a Carlo Porrovecchio

3[^]B(1)

3[^]E

3[^]B(2)

WHAT DO I THINK OF THE INTERNET?

- I think internet is very useful because it can be used to do research for school or to find work or simply to have fun but you have to use it in moderation because on the internet there are many dangers

Play videogame online

I really like playing video games especially with my friends, we have a lot of fun, but sometimes video games cause damage to health, both physical and mental. In fact many times they are addictive and many young people no longer have a social life.

Me & Internet

CYBERBULLISM

- ♦ Through the internet, many children often suffer insults, threats or insults. this is cyberbullying. Many young people suffer from it and often remain silent out of fear. Prevention is needed to avoid it

The Negative Side Of Internet

- There are many pitfall on Internet, because when we accept someone's friendship online, we have to be very careful about who's hiding behind the screen, we don't know if he is our friend or if he is a pedophile.
- We must be careful at fake news that are created by anonymous users to frighten.

POSITIVE AND NEGATIVE EFFECTS

POSITIVE EFFECTS:

- HELP US STUDY IN THIS PERIOD OF COVID-19 PANDEMY
- CREATE NEW FRIENDSHIPS WITH PEOPLE FROM ALL OVER THE WORLD
- HAVE ALL THE NEWS WE NEED FOR PROJECTS, PERSONAL ACQUAINTANCES ETC

NEGATIVE EFFECTS:

- KNOW OUR PERSONAL DATA
- ALWAYS CHECK WHAT WE DO
- WE MAY HAVE VIRUSES THAT WILL NO LONGER MAKE US USE OUR DEVICES

Hi, my name is Ida.

I think that social networks are very useful nowadays, but you need to be responsible and mature to make a good use of them.

Me & Internet

Me and Internet

Hi, I'm Francesca, I go to Rosso di San Secondo school in Italy, precisely in Sicily. As social use: Instagram, Whatsapp and Tik Tok, and use them for about 6 hours a day. I mainly follow famous people, I've been on social media for some time, and I'm aware of the risks that can be taken online, like the theft and the sale of your data, or the encounter of malintentioned people. In addition, cyber bullying is very widespread, particularly in social media. In my opinion, the parents of an unripe or younger boy or girl should not take over a telephone, as they are small, they have no awareness of their actions. That's why we have to remember to be careful and not to get in to dangerous situations.

Unfortunately she runs the risk of no longer recognizing reality from fiction, the phenomenon of cyberbullying that I myself have tried is frequent, revenge porn to conclude, there are hackers who urbanize our identity and our data.

Remember that social networks were made for useful functions not to feel bad so it is good to treasure them! social media can be harmful or valuable, it's up to you to learn how to use them.

The Internet is used by everyone today.
It has become fundamental in our lives.
Like everything it has both positive and negative sides.

positive effects

- 1- real-time information around the world
- 2-broaden knowledge
- 3- listen to music, watch movies and TV series ...

Me & Internet

POSITIVE

1. These sites allow people to find others with similar interests that they can create a relationship with and get to know one another
2. Event invitations can be made and sent to friends rather than having to mail invitations and friends can also answer for an event on the site

NEGATIVE

1. Cyber bullying occurs as well, which is bullying people online in a public Warburg, but occurs at a small percentage
2. A false sense of security leaves social networking site users vulnerable to security attacks such as hacking, leaking sensitive information, and sending viruses

-Tendency to lose touch with reality; now kids spend more time with the phone on social network instead of going out with friends or interacting with family. Internet leads to isolation from having no contact with reality, but only with the virtual one
